

Nevada Faith and Health Coalition

Priorities Discussion

People who are afflicted with HIV/AIDS can also experiencing other health challenges like diabetes and hypertension.

What do you think are other common health problems or challenges faced by people struggling with HIV/AIDS?

What are the top 3 health related priorities you recommend the coalition to address?

People who are afflicted with HIV/AIDS can also experience other challenges not associated with health, like lack of education or being stigmatized.

What do you think are other common non-health problems or challenges faced by people struggling with HIV/AIDS?

What are the top 3 non-health related priorities you recommend the coalition to address?
